Gabriel Guimarães da Rocha

Front-End Engineer · Angular · React · TypeScript
Brazil (UTC-3) · Open to remote | gabrielguimah@gmail.com | linkedin.com/in/gabriel-guimarães-da-rocha-42b1a8206

PROFESSIONAL SUMMARY

Front-End Engineer with 5+ years of experience building enterprise web and mobile applications with Angular, React and TypeScript. Currently at TOTVS, one of Latin America's largest software companies, developing the TOTVS WMS used in the warehouse operations of major brands such as Grendene and Fini. Strong focus on automated testing, performance and maintainable code, with full-stack experience in Ruby on Rails.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Ruby, SQL, HTML, CSS
Front-End & Mobile: Angular, React, Ionic, PO UI, Kendo UI, Responsive Web Design
Back-End: Ruby on Rails, SQL Databases
Testing: Jest, Jasmine, Karma, RSpec, Unit Testing, Mocks/Spies/Stubs
Tools & Practices: Git, DevOps, Scrum, Kanban, Production Monitoring, Technical Documentation

PROFESSIONAL EXPERIENCE

Front-End Developer, TOTVS

September 2022 – Present | *Full-time*

- Develop web and mobile features for **TOTVS WMS**, an enterprise Warehouse Management System running the logistics operations of large companies such as **Grendene** and **Fini**.
- Build responsive, high-performance interfaces with Angular, TypeScript, Ionic, PO UI and Kendo UI, designed for warehouse operators who use the system throughout their daily shifts.
- Deliver new features and customer-driven demands in the shipping, replenishment and picking modules, translating client requirements into production-ready solutions.
- Write and maintain unit tests with Jest, Jasmine and Karma, testing components, services and business logic in isolation with mocks and spies to prevent regressions and keep the codebase safe to refactor.
- Monitor production error queues to identify, investigate and fix issues affecting customer operations.
- Take part in backlog refinement, breaking down requirements, estimating tasks and defining acceptance criteria; write and maintain technical and functional documentation.

Full-Stack Developer, Tiflux

January 2021 – September 2022 | *Full-time*

- Developed features end to end for Tiflux, a SaaS service desk and IT service management platform.
- Built front-end interfaces with React, JavaScript and TypeScript, and back-end logic and data operations with Ruby on Rails and SQL.
- Wrote automated tests with RSpec and investigated and fixed bugs through functional validation and troubleshooting.

EDUCATION

Bachelor's Degree in Information Systems

Univille – University of the Region of Joinville | *January 2021 – July 2025*

Technical Diploma in Informatics

SENAI – National Service for Industrial Training | *January 2019 – December 2020*
